

## Velox:

# Adding Value to Operations and Profits via a Centrally Monitored and Secured IT Infrastructure

**D**ue to increased use of Information and communication technologies in business, the internal and external threats to IT Infrastructure and Cyber space is becoming a concern of worries in any industry. However, the solution to these concerns is very limited in the industry, monitoring, controlling and keeping entire IT Infrastructure secured from central location is a pain area for CIOs, CTOs, IT Heads and Management.

Battling these predicaments for organizations, Mumbai headquartered Velox Solutions Pvt. Ltd has devised a flagship product namely- SecureIT – Centralized IT Infrastructure and Network Monitoring System.

SecureIT and other products such as IT Help Desk, File Integrity System, IT Asset Management System, IT Knowledgebase, Change Management System, ScanPlus Antivirus etc. definitely improve the business performance of users, system and operations, thereby helping the management and organization in decision making.

Velox is the first Indian Company which offers complete IT Infrastructure including Cyber Security, Monitoring solution, Security Operations Centre (SOC), Mobile Security, Mobile Device Management (MDM) and Network Monitoring System (NMS). These solutions are web and mobile based, and are developed using open source development

platforms to have integrity with any technology or protocol.

Velox, with its diligent Research and Development (R&D) Management team, has streamlined the development cycle, services, and deliveries while adopting world class ISO 9001:2008 process for internal and external operations. The process and industry best practices pursued by team Velox has assured clients that the solutions and services delivered through Velox's products are at par and adding value to their business, operations and profits. "The confidence of the market is concerned with these important aspects, as our satisfied clientele are increasing tremendously in every sector ranging from Banking, Manufacturing, Healthcare, IT, System Integrators and Governments", says Mangesh Amale, Founder and Director, Velox.

### SecureIT & NMS

SecureIT showcases real time monitoring attributes like use, misuse, health, failure of desktops, servers, routers, switches, links, WAN and LAN Network, Printers, Scanner, Biometric, IP Cameras, ATMs etc to name a few. Velox's comprehensive suite of Network Monitoring System (NMS) serves for Wired and Wireless platforms covering MPLS, Lease, Broadband, WiFi, VSAT and RF. SecureIT is a web based product with its dashboards also available on 'Run on Move' platform on mobile through

Mangesh Amale,  
 Founder and Director

Velox's products and solutions control the use and misuse of IT systems by producing a real time picture of the IT Infrastructure

mobile apps. This gives one the power to monitor and control the entire IT Infrastructure from a mobile device.

Velox's products and solutions control the use and misuse of IT systems by producing a real time picture of the IT Infrastructure to HR, MD and Directors. At the same time, the offerings generate real time alerts/memo, using e-mails, dashboards, SMS and automated ticketing. The solutions developed are competent enough to run on cloud platforms like Oracle Cloud, correspondingly inducing a reduction in the cost of ownership of the solution.

Mangesh Amale, a visionary has earned the achievement award from a government managed forum for industries and commerce called 'Udyogshree', in the year 2012, Velox is currently serving over 110 clients globally including elites like BSNL, Trimax, C-Edge, Metropolitan Stock Exchange, NeSecure Networks, Saraswat Infotech, Hindusthan Bank, Decan Bank, etc. With a vision to carry Velox to global heights, the team is working towards establishing a distributor and partner network within India and overseas to offer an entire suite of deliverables on Capex and Opex platforms. **CR**
